**Product Information**

**Description & Recommended Uses**

The Wetwall Waterproof Wall Panel System is a patented, tongue-and-groove bathroom panel system that locks water out without the grout. It's a revolutionary design material that transforms bathrooms quicker, more cost-effectively and easier than shower tile. It is suitable for use in all wet area applications, from shower walls to bath surrounds to accent wall cladding. It preferably coordinates with bath surface materials, patterns, and designs to complete the look of the bath.

**Product Composition**

Wetwall decorative wall panels are constructed of high pressure decorative laminates adhered on the front and back with a waterproof adhesive on a homogenous, lightweight waterproof core composed of cellulosic materials, glass fibers, polypropylene and a bonding agent, resulting in a durable, waterproof, and dimensionally stable panel.

**Basic Limitations**

Wetwall is for interior use only and can be installed directly over gypsum board, moisture-resistant gypsum board ("green board"), cement backer board, plaster, and existing hard tile. It is not a structural material and must be bonded to a sub-wall.

**Patterns & Colors**

Wetwall is available in different variations and sizes with bullnose outer profile edges and/or tongue-and-groove jointing systems that can be combined with wall cladding in a wide variety of bathroom design layouts. See all designs at [www.wetwall.com](http://www.wetwall.com).

**Finishes**

Panel designs incorporate ÆON™ Performance Technology for scratch and scuff resistance and built-in antimicrobial protection to inhibit the growth of stain and odor-causing bacteria, mold, and mildew.

**Back Wall Configurations**

**Tongue Edge + Flat Edge** – The easy-to-handle TE/FE panels are ideal for a seamed back wall.

**Groove Edge + Flat Edge** – The easy-to-handle GE/FE panels are ideal for a seamed back wall.

**Flat Edge + Flat Edge** – The FE/FE panels are best for a one piece wall.

PANEL HEIGHT	PANEL WIDTHS AVAILABLE

96"	8"   30"   32"   36"   48"   60"

### Utility Wall Configurations

**Tongue Edge + Groove Edge** – The most flexible panel is used when you want to continue the design beyond the single-panel widths.

**Tongue Edge + Bullnose Edge** – Use this Bullnose Edge combined with a TE to cap the end of the TE/GE panels.

**Groove Edge + Bullnose Edge** – Use this Bullnose Edge combined with a GE to cap the end of the TE/GE panels.

**Bullnose Edge + Bullnose Edge** – With two Bullnose Edges, this is the ideal panel to feature a free-standing bathtub or a stand-alone wall.

## Codes and Certifications

### General Standards

Wetwall decorative surface properties conform to the voluntary standards of the American National Standards Institute for thickness, performance properties, and appearance. Wetwall decorative surface properties meet or exceed the International Standards Organization specifications as found in ISO 4586, titled "High-Pressure Decorative Laminate (HPDL) – Sheets Based on Thermosetting Resins – Part I: specifications." Branded Cleaner and Sanitizer Resistance for Wetwall per ISO 4586-2 Method 31 (B) No effect was exhibited except as noted (\* or \*\*) on the following:

1. Beckart Environmental (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect®

31. Spic and Span® Everyday (Antibacterial Cleaner)

Test Procedure: Listed reagent materials were placed in contact with the Wetwall surface with a one-inch square 100% cotton cloth completely saturated and covered with a 2" (50.8mm) diameter watch cover glass for 15-minute duration. The reagents listed above were removed with a clean cloth, and the area was then cleaned with a clean cloth and distilled water only. The surface area was allowed to dry for 1 hour prior to evaluation for effect.

\* Causes slight change of gloss or color.

\*\* Causes slight damage, with a degree of damage proportionate to the length of exposure and concentration.

Resistance of Furniture to UV Lights for Wetwall decorative surface per BIFMA HCF 8.1-201X Section 9 (Alternate Method per ASTM G155 using ISO 4586-2.33 conditions).

Wetwall decorative surface properties meet or exceed the acceptance level for surface evaluation per International Standards Organization specifications as found in ISO 4586, titled "High-Pressure Decorative Laminate (HPDL) – Sheets Based on Thermosetting Resins – Part I: specifications."

## Installation

Wetwall's patented tongue-and-groove system literally snaps together to go right over your existing tile, without grout or sophisticated tools. Download our complete installation guide or view short videos to see how easy it is to install.

## Care & Maintenance

Care and maintenance of the Wetwall Waterproof Wall Panel System is easy. Warm soapy water and a sponge will be adequate for regular maintenance. Common non-abrasive household cleaners can be used with a soft sponge or cloth. With all cleaners, rinse immediately. Wetwall has no grout lines to clean and is non-porous, so sealing is never required.

## **Recommended Cleaners**

Warm Soapy Water, Lime-A-Way® Cleaner, Mr. Clean® Magic Eraser, Tilex® Bathroom Cleaner, Fabuloso® All-Purpose Cleaner, Fantastik® All-Purpose Cleaner, Windex® Multi-Surface Cleaner, Formula 409® Multi-Surface Cleaner, Simple Green® All-Purpose Cleaner, Pine-Sol® Multi-Surface Cleaner, Green Works® All-Purpose Cleaner, Spic and Span® Liquid Multi-Surface & Floor Cleaner, \*Diluted Bleach Solution

\*1/4 cup of bleach to 1 gal of water is recommended. Rinse immediately as prolonged exposure of bleach on the surface will cause discoloration.

**DO NOT USE:** Abrasive or Gritty Cleaners, Scotch-Brite™ Pads, Comet® Bleach Powder or Soft Cleanser, Strong Solvents (Thinners, MEK). Avoid these cleaners, which may damage or dull the surface of Wetwall. Use of these agents will also void the Wetwall warranty.
